Bootstrap
Javascript
React JS
RestFul API
UI/UX
C++
C#
Java
PHP
Python
.NET
SQL
Flutter

LANGUAGES

Arabic (Native)
English (Fluent)

EXPERIENCE

- STS Specialized Technical Services (18/2/2024 – 18-4-2024) - Full Stack Development Training
Developed a CRUD employee management system using ASP.NET core, SQL Server, EF Core, RestFul API, and React JS

PROJECTS

- UNIVERSITY OF JORDAN RESTAURANT MANAGEMENT SYSTEM
 Developed a website for the University of Jordan's restaurant's main services using HTML, bootstrap, JavaScript, and PHP.
- FRONT-END PROJECT FOR HELPING VISUALLY IMPAIRED PEOPLE
As part of a team, me and my teammates used HTML, CSS, JavaScript, and Bootstrap to implement the front end, as well as the project's documentation.
- Weather Forecast Website
 Developed a website for weather forecasting using asp.net, and API integration using RestFul API
- MediMind Medicine Management App
Developed an app using Flutter that enables patients to manage their medications.
- Notify JU (Graduation project)
As part of a team, we developed a mobile application using Flutter for university students and staff where they can report different problems and send them directly to the concerned authorities. I was responsible for the backend development; I used Firebase for the database and Getx for state management.

COURSES

- UI/UX Design Course - with a total of 32 hours.
- ASP.NET (MVC) Course - with a total of 40 hours.
- Artificial Intelligence workshop in Data Analysis and Machine Learning
- The Complete Flutter Guide
